

# PROJECT BASED LEARNING

Tellus College understands that not all students are ready to gain work experience abroad. This could be for many reasons such as language skills, the age of the students or because the sectors are highly specialised.

Our project based learning programme is the ultimate environment for those looking to consolidate their vocational skills before entering work.

Students are given practical project based tasks culminating in group presentations of key objectives and learning outcomes.

The programme has clear relevance to the world of work and qualified industry experts to prepare students in the specific vocational sectors. It is, quite simply, the complete learning and training experience.

**COURSES INCLUDE:** Advertising, Business Admin, Computer Maintenance, Entrepreneurship, Leisure and Tourism, Marketing & Sales and many more.
